## Camp Design Gallery

«Camp is primarily a way to enjoy things, to appreciate them, not to judge them» writes Gillo Dorfles.

Camp recovers the taste for dandyism and irony. It is an intellectual effort, it's about daring and going over to the limit of good taste that borders with the refined and aesthetically pleasing, leaving intrigue from history that every object has in itself. Thus it was born Camp Design Gallery, specializing in collectible contemporary design, which aims to investigate the material culture, renewing the concept of design and production beyond the canonical limits of art and design in the name of unique works, exclusive and different. The gallery is based on the collaboration between Beatrice Bianco and Valentina Lucio that after several years of experience at Italian and international galleries, from 2015 undertake a common path: more personal and free interpretation on contemporary design collectibles. Their work is based on research, experimentation, contamination of contemporary codes and languages that result in unique design objects born from the collaboration of international designers and artists with the wise manufacturing culture. Among the collaborations of Camp: Analogia Project, David Lindeberg, Felix Muhrhofer, Paolo Spalluto, Veronica Todisco, Marcin Rusak, Giacomo Moor, Omer Polak, Zaven, Rosanna Bianchi Piccoli, Sergio Maria Calatroni, Dossofiorito, Paolo Gonzato. Camp, alongside with the gallery, engages in scouting and guidance for new talent, through a continuous mix of renovation, study and research and an annual program of exhibitions, trade shows and events - Operae 2015-2016, Design Days Dubai 2016, Miart 2016. A new space for design, a place that generates opportunities and synergies to create a constructive cultural network, critical and dynamic, opening up to curatorial projects and partnerships with cultural institutions and art foundations.

Medusa - Lonesome cowboy Nando**

Turritopsis Nutricula is a small jelly fish, more commonly known as the Immortal Jellyfish: it has the unique ability to invert its own life cycle, and once reached adulthood, can transfer its cells back to childhood, in a hypothetical perpetual regeneration. This small being was discovered by the team of marine zoologists led by Ferdinando Boero, a well-known researcher dedicated to the divulgation and safeguarding of marine ecosystems in Italy and abroad and also known for his unique friendship with the guitarist Frank Zappa, who dedicated him a song: Lonesome cowboy Nando. Inspired by both the zoological and mythological Medusa (in Italian a jellyfish is a medusa), Elena Salmistraro has conceived a hanging seat. Trakatan's know-how in making handbags has made possible an unusual approach to leather: the soft material is not used simply as way of upholstering an existing structure, but rather it becomes the medusa itself.
